

To mount your power supply you'll need:

- Scissors or Utility Knife
- Phillips Head Screwdriver
- Electric Drill with 1/8" (or 3mm) Drill Bit

1. Cut and install 2 strips of the included hook-and-loop tape (hook side only) to the bottom of your power supply.

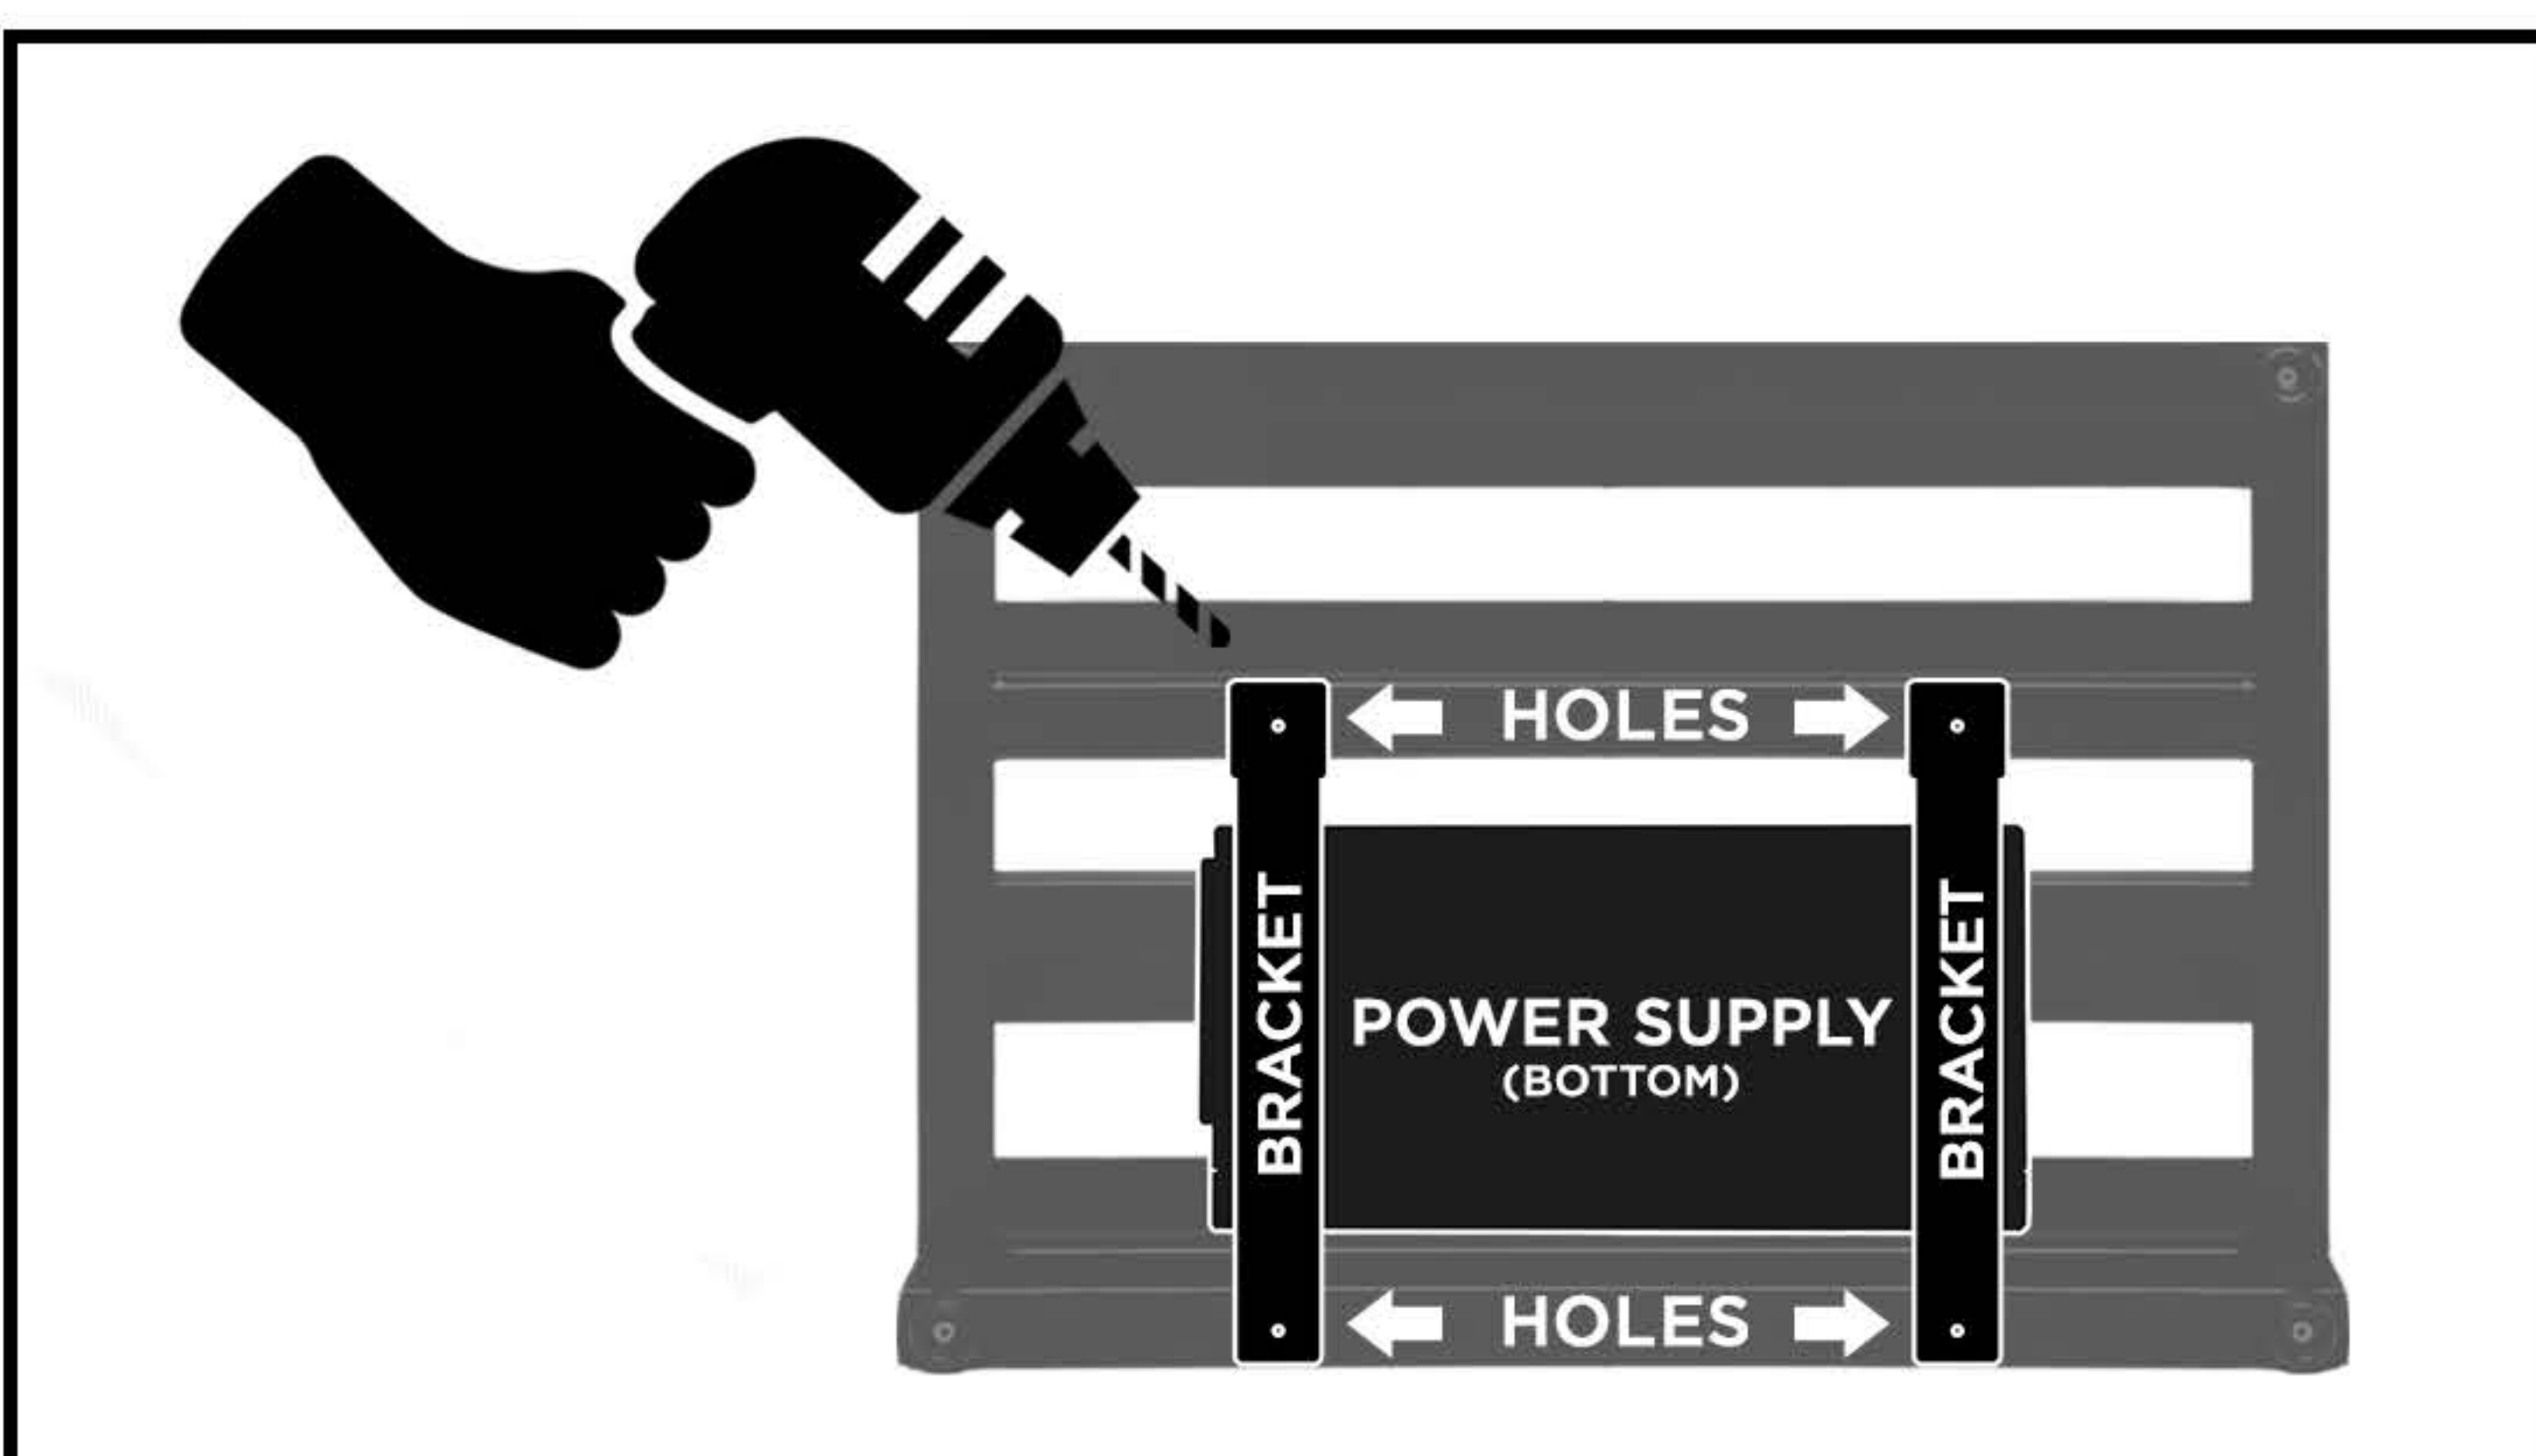

2. Adhere 6 inch long strips of hook-and-loop (loop side only) tape to both bracket pieces.

3. Firmly attach power supply to both bracket pieces.

4. Place power supply and bracket pieces in the desired position on the underside of your pedal board and mark holes for drilling.

5. Hold power supply and brackets in place and drill all 4 holes with a 1/8" (or 3mm) drill bit.

6. Complete installation with included screws and a phillips screwdriver.
